Office Action Summary	Application No. 10/666,531	Applicant(s) SALZER ET AL.	
	Examiner M. Lee	Art Unit 2622	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 5-14, and 18-29 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-14, 18-29 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Klink et al. (5,548,341).

Regarding claim 1, Klink discloses a picture-in-picture television receiver showing a main picture video source 102, which meets the receiving step as claimed, a inset picture video source 104, which meets the additional image as claimed, a picture-in-picture processor 106 synthesizes the main picture 102 and inset picture 104 according to a multiplexing signal (col. 2, line 1) or PIP timing, which meets the superimposing step as claimed, and a video processor 200 for processing the main and inset pictures differently according to the PIP timing 116.

Art Unit: 2622

Regarding claim 2, the main picture signal and the PIP timing in Klink have the same pixel clock frequency because they both manipulate the same set of pixels in a frame.

Regarding claim 15, see rejection to claim 15.

Regarding claim 16, see display 112.

Regarding claim 17, see rejection to claim 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klink et al. (5,548,341).

Regarding claims 3 and 4, Klink does not specify the generating step for generating user interaction information. The examiner takes Official Notice that using OSD for generating interaction information to a viewer is well known in the art because it provides information and instructions to the viewer to facilitate further actions. This clearly enhances the control operation of a television receiver. Knowing that the inset image 104 could be any conventional video source, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to include the well known OSD feature into Klink to perform the well known functions as claimed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
